

REMARKS

Careful consideration has been given to the Official Action of June 23, 2005 and the above amendatory action has been taken to place the application into condition for allowance. In particular, the application has been amended to correct informalities noted by the Examiner and to place the claims into substantive condition for allowance.

With respect to the informality, the abstract has been rewritten in compliance with 37 CFR 1.72(b).

Claims 1-9 have been cancelled without prejudice, leaving claims 10-20. Claims 11 and 14 have been amended as suggested by the Examiner to be relieved of their informalities.

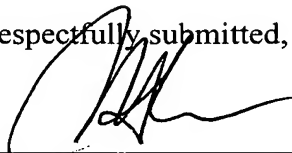

The Examiner has indicated the allowability of claims 10-15 and these claims remain. Claims 16-20 which are drawn to a non-elected invention have been amended so that they are properly dependent from allowable claim 12 and accordingly, are deemed to be in condition for allowance therewith.

Since only allowable claims remain in the application, discussion of the cited art is rendered moot.

The specification has been amended to correct several occurrences of grammatical informalities.

It is respectfully submitted that the application is now in condition for allowance, early notice of which will be appreciated.

Respectfully submitted,

JULIAN H. COHEN
